

Increasing data allowances on mobile devices

This scheme temporarily increases data allowances for mobile phone users on certain networks. This is so that children and young people can access remote education if their face-to-face education is disrupted.

Who can get help

Schools, trusts and local authorities can request mobile data increases for children and young people who:

- do not have fixed broadband at home
- cannot afford additional data needed to access educational resources for their devices
- have access to a mobile device that uses a participating network
- are experiencing disruption to their face-to-face education

Children with access to a mobile phone on one of the following networks might be able to benefit:

- Three
- Smarty
- Virgin Mobile
- EE
- Tesco Mobile
- Sky Mobile

Other providers may join the scheme at a later stage.

The amount of data someone will get depends on their mobile network (see below for details). Some networks can't offer data to Pay-as-you-go (PAYG) customers.

When the request has been processed the customer will receive:

- a text message when their free data has been activated
- when their free data will end
- that this data can be used when tethering a mobile phone to another device for internet access
